

Stanley FATMAX

A superior lightweight, easy to read measuring tape. This rugged tape is built for the jobsite boasting an 11' stand-out (point at which the blade extends without buckling), a tough 1 1/4" wide Mylar polyester film coated blade and comes as a 16', or 30' Imperial measurement.

Speed Square

As the name implies, this square allows quick, accurate marking of straight and angled cut lines on framing material.

Estwing 20 oz Straight Claw Hammer

A well-balanced, shock resistant, built for life tool. This is a good all purpose hammer. The 20 oz Stanley Anti-Vibe is of equal quality.

Olfa Utility Knife

Features an easy slide & lock blade change, has a tough shell, and even comes with a handy paint can opener at the rear.

DeWalt Ratcheting Screwdriver

With reversible action and 12 bit storage and shaft removal so you can turn it into a "stubby" in tight spots. This tool replaces a full screwdriver set.

Stanley 3 piece chisel set.

Your toolkit should consist of 1/2", 3/4", and 1" sizes. Keep them sharp & ready to go for installing locksets on passage doors.

DeWalt Job/Keyhole Saw

For cutting fast, precise holes in drywall.

Makita Cordless 18 volt, Lithium Ion Drill & Impact Driver set.

I've tried em' all. This set in my opinion tops the list of cordless drills and is an absolute asset to any tool kit for its power, durability and light weight handling.

Flat Bars

The Estwing heavy demolition/nail puller. The medium duty flat pry bar, and Richards makes this fantastic little 10" lever scraper that's great for fine finish work, such as removing casing and baseboard without causing wall damage.

Rockwell Sonicrafter Oscillating Multi-Tool

This beast is the most versatile multi-purpose cutting tool I have ever used, boasting a powerful 4 Amp motor and highest degree of oscillation in its group. With a quick tool-free blade change, this tool will not let you down! Works where every other saw will not fit. Ideal for undercutting door jambs, or any piece of stationary wood/material with accuracy. ■
